

I'm a product designer who applies business knowledge to balance user needs with business goals, front-end skills to ship responsive, human-centred designs, and AI workflows to speed up iteration and development. Shipping user-tested designs for local businesses and side projects. Ambition drives me as a designer, and I constantly strive to improve my processes, knowledge, and design thinking.

Projects

NORTH COAST BRAZILIAN JIU-JITSU

[Live Site](#) (Solo Designer) • November 2025 — August 2026

Planned, designed and shipped a static site for North Coast Brazilian Jiu-Jitsu, designed in Figma and built in Framer, with the goal of funnelling visitors into signing up for a free trial class.

- 228 unique visitors viewed the site per month as of July / August.
- Achieved a 92 SEO score on Lighthouse through accessibility-led design decisions.
- 50 new users enquired in the first month of the site being live.
- Gained client buy-in through showing design mock-ups of their potential site.
- Conducted user interviews and user-flow testing to inform design decisions and scoping.
- Integrated affiliated brands and sponsor brand guidelines, working with marketing teams.
- Reapplied the Figma designs using Framer custom code components to reduce post-handover editing errors and implement a design system.

"Reese went above and beyond my expectations of what the site could be" - Coach Daniel

DATABREW

Chromium Extension (Front-End Designer / Engineer) • November 2025 — Present

Created the front-end architecture and design of a Chromium extension that uses AI to summarise developer tool release notes and articles. Partnered with a data engineer to build the back end and release the extension on the Chrome Web Store.

Product UI and branding made using Claude Code and Paper with a working dev build v0.3.

PERSONAL WEBSITE

[Portfolio](#) (Front-End Designer / Engineer) • August 2026 — Present

Modern portfolio website designed in a codebase with accessibility and performance at the forefront.

Wireframed in Paper then intentionally built into the codebase with the Astro framework to improve accessibility, SEO, content/page loading times and component management.

Experience

PRODUCT DESIGNER

Freelance (Inverness) • November 2025 — Present

Working within the local community to improve the design of SME sites, learning by creating live tools and gaining experience with clients.

Experimenting and iterating my own design processes with AI to speed up prototyping and iteration.

BUSINESS OWNER

Finesse Car Care (Inverness) • July 2024 — October 2025

Founded my own car cleaning business as sole owner of a Ltd company, handling all aspects of the business and building B2B relationships with local businesses.

Designed marketing materials and developed the marketing strategy, bookings, accountancy, social media marketing and customer relations.
